EXPERIENCE

Code Willing, LLC   Baton Rouge, LA
Software Development Intern   6/17 - Present
- Programmed a data quality integration testing suite in Python to analyze the accuracy of market data feed handlers used in algorithmic trading.
- Assissted in building a feed handler to process cash equities data. Aggregating data into a series of groups with low latency.
- Developing done using continuous integration & version control (git)

IWD Agency   Baton Rouge, LA
Web and Software Development Intern   2/17 - 5/17
- Built e-commerce websites in a small team atmosphere. All projects included back-end SQL & PHP, front-end HTML, CSS, & JavaScript.
- Worked on general app maintenance, completing assigned tasks (new features, bug fixes) within a limited time frame.
- Communicated with sales and dev team to prioritize efforts. Practiced Agile and Scrum in 2 week sprints.

PROJECTS

TigerHopping
- Nightlife app for the LSU student body, where users can coordinate their attendance.
- Built automated scheduler in Python that scrapes local webpages and uses the Twitter API to update events and deals being offered for the day.
- Used MongoDB & Node.js for backend.

QueueTube
- YouTube powered web app with instant searching, automatic play, history, and playlist capabilities.
- A single page dynamic application built with React.js & Redux.js.
